

Project 8003b
Session CD-42
100900 Jun 80

Remembering a previous session
same place he was the other day

multi gabled roof

lot of long bldgs side by side attached
to each other

towers 200 yds away from this bldg

a. anything else?

metal junk laying around - parts of old
machines.

outside a fence - some kind of multi-
dish antennas across the road.

f. left - multi-roofed bldg.

to r. storage tanks (sic) and

further to r. - bulk liquid storage
to ri slightly is tower

b. move over multi-roofed bldg
something like fire stops

c. what is ~~most~~ ^{primary} aspect of this whole
target area?

saw 2 more antennas

strong feeling of training

thumb

d. raw data

feeling awareness
describe feeling / awareness
feeling of curiosity / excitement
young people there once
rather than working - curious and
excited - he thought that was
decorating

external steam pipes going into
this bldg and others

one (bldg) behind him on same
line as multi-roofed bldg
made of metal, one story,
3-4 times longer than wide

move into multi-roofed bldg to center
and describe to me.

big open shell - open bays
light from overhead - maybe
windows in roof
rows of steel posts support roof
all kinds of equipment in here
some is alike but most of it is
different

big fire truck pit thing 20/30' x 10/15'
Carts and overhead hoists
trucks and different vehicles

what is function of bldg itself

Somewhat associated with training
several samples of different items

move to one end of bldg - describe

floor is wet

truck sitting over there

like they washed down a couple
of vehicles.

looks like you can drive in
one side straight through and
out other side.

go to other end

Some kind of giant forge or some-
thing cold fired.
get feeling of heavy equipment
very open uninsulated

activity right now?

couple people - maybe security -
but he doesn't know security
of what.

move slowly out of bldg - maintain con-
tinuity - describe as you go.

break

Is this the multi-roofed bldg?

I guess

look for the metal bldg
where

you said it was behind
oh yes

Storage shed maintenance type bldg.

OK move inside and tell me what's
inside

big steel container bigger than a truck.

got big doors on it and its got "dogs" on it like an tight or liquid tight.

goes up about 2/3ds to roof.
what is activity

nothing stirring

what is function

I don't know

move out side on to ground. you said it was familiar - do you still feel familiar

trucks are gone

can't find the new bldg

thought something of memory

overlay but can't find the new bldg

look for new bldg.

wait a minute (cough)

I saw new bldg but tried to

see where it was from bldg

he went in white cap but

lost it - try again

feeling more than one bldg with multi-gable.

apparently a few hundred yards to the SE of where he was. he sees fence, road.

now enter new bldg and describe

back outside

→ anything else in area you recognize

3 trucks - rest are gone - Think its same area

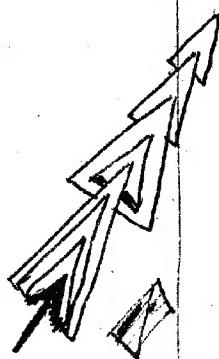

Old bldg has doors closed

old bldg -

Same as other day
Move right inside

a lot like the other bldg -
constructed a lot the same
one or 2 each of quite a
few things - brand spanking
new. Look like have not
been field abused

what has not been field abused

like amphib vehicle

SP gun setting over there

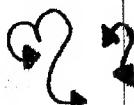

Must on it - sitting a
long time

mobile AA gun w/ radar
dish and small cables on
top of it.

look through (while turn tape over)

→ when you're ready, tell me

Large extremely heavy truck that
doesn't look like a truck

Some tanks - some with turret off, some with tracks off, one without engine.

How many tanks are there

They're not all alike - 5 to 8 - not very neatly arranged - all mixed up.

what doing?

Not prod, suspect test/evaluated research

what makes you say

Production line has a particular flavor but here diff kinds of pieces sitting around w/ components removed - does not resemble methodology of a production line.

New projects come in they work on one with shortest deadline.

what else in bldg.

Couple old blded 172 mm art pieces but had feeling they weren't interested in tubes so much as whole gun like maybe a modified test bed or something

what other equip?

I don't recognize all of it.
Tracked rocket launcher with
some kind of funny racks
on its back.

Front end - looks more like
a truck than a truck but
has open compartment on
its back with big racks.

What is presently the most important
aspect of the target today?

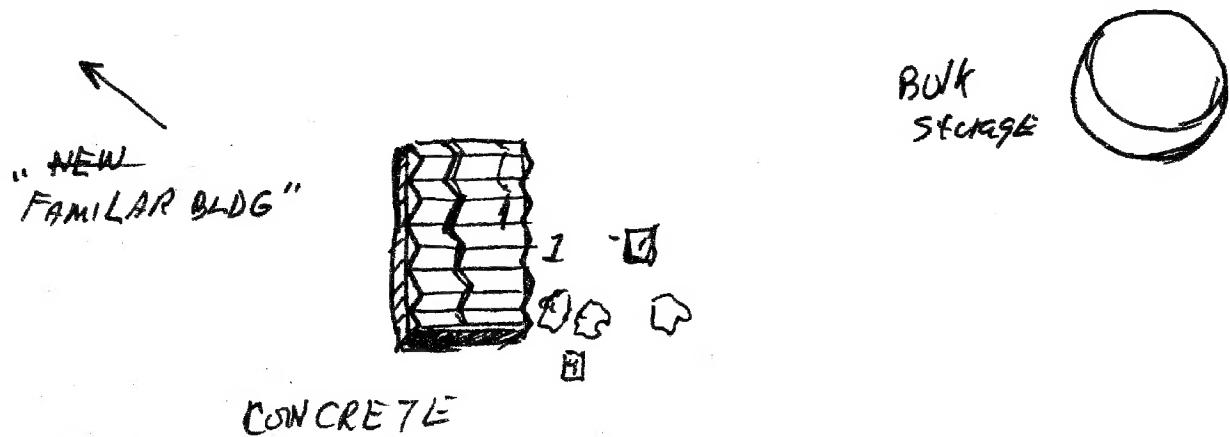

Looked all over - not much diff or
exciting - feeling the lack of
people important but maybe
the I just ignored them.

feeling something was "fired"
red flashing lights like several
danger areas. restricted access warning
nothing to add.
